

ARYAN YADAV

Full Stack Developer

+91-9711804965 | ay132441@gmail.com
in LinkedIn | GitHub | Portfolio | Gurugram, Haryana, India

PROFESSIONAL SUMMARY

Full-Stack Web Developer with internship experience at a tech company, specialising in scalable web applications and AI-powered SaaS products. Skilled in React.js, Node.js, Express.js, PostgreSQL, MongoDB, and cloud deployment via Vercel and Render. Proven ability to build and ship production-ready applications end-to-end, from UI to backend to deployment.

EDUCATION

Bachelor of Technology — Computer Science and Engineering

Dr.Shakuntala Misra National Rehabilitation University

CGPA: 8.02

Nov 2022 – May 2026

Lucknow, Uttar Pradesh

INTERNSHIP EXPERIENCE

Bytematrix.in

June 2025 – August 2025

Software Engineer Intern

(Remote)

- Built and delivered 4+ responsive, cross-browser websites using HTML5, CSS3, JavaScript ES6+, and Bootstrap — improving page load performance and mobile usability by 30%.
- Collaborated directly with clients to translate requirements into pixel-perfect, accessible UI/UX experiences.
- Integrated third-party APIs and dynamic data rendering, reducing manual content update effort by over 50%.
- Participated in agile sprints — code reviews, sprint planning, and live milestone demos with stakeholders.

JPMorgan Chase

June 2026

Software Engineering Job Simulation (Forage)

- Developed a Spring Boot microservice that consumed and processed high-volume transaction messages via Apache Kafka, integrated an external REST Incentive API using RestTemplate, and exposed REST endpoints for real-time user balance queries.
- Designed and implemented transaction validation, entity modeling, and persistence logic using Spring Data JPA with H2 database, ensuring accurate balance updates; validated end-to-end functionality through Maven-based test suites and debugging.

PROJECTS

AI BuildWebApp — AI-Powered Website Generator [Live Demo](#)

- Built a full-stack AI SaaS platform where users describe a website in plain English and Groq LLaMA 3.3 70B generates a complete, responsive HTML/CSS/JS website in under 10 seconds.
- Implemented a credit-based monetisation model with Stripe Checkout integration — users buy credit packs to generate websites.
- Developed a Referral & Earn system — users share a unique referral link; both referrer and new user receive bonus credits on signup.
- Built live iframe preview, code view toggle, one-click HTML download, and a regenerate button for fresh designs from the same prompt.
- Integrated Clerk authentication with auto user provisioning via webhooks and Neon serverless PostgreSQL for data storage.
- **Tech Stack:** React.js, Vite, Node.js, Express.js, PostgreSQL(Neon), Groq API, Clerk, Stripe, Vercel, Render

ShowTime — Movie Ticket Booking Platform [Live Demo](#)

- Built a full-stack cinema booking platform with real-time seat selection, secure online payment integration, and dynamic movie data via TMDB API.
- Implemented end-to-end authentication and session management using Clerk with support for multiple sign-in providers.
- Designed scalable event-driven backend workflows using Inngest for booking confirmations, seat locking logic, and async notifications.
- Built advanced features including seat-level conflict resolution, personalised user dashboards, and favourite movie filtering.
- Deployed on Vercel with optimised performance settings; achieved high Lighthouse scores across all Core Web Vitals.
- **Tech Stack:** React.js, Node.js, MongoDB, Clerk, Inngest, Stripe, Vercel , Brevo, nodemailer

TECHNICAL SKILLS

Programming Languages:	JavaScript (ES6+), Java (Core), C, SQL
Frontend Development:	React.js, Next.js, Tailwind CSS, HTML5, CSS3, Bootstrap
Backend Development:	Node.js, Express.js, REST APIs, JWT, Webhooks
Databases:	MongoDB (Mongoose), PostgreSQL (Neon), MySQL
Cloud & DevOps:	AWS (EC2, S3), Docker (Basic), GitHub Actions CI/CD, Vercel, Render, Cloudflare
Core CS:	Data Structures & Algorithms, Computer Networks, Operating Systems

CERTIFICATIONS & ACHIEVEMENT

Centum Foundation	Dec 2025
– Employability Enhancement Programme (supported by Infosys Foundation)	
Web Development Workshop	Sept 2024
– Hands-on training in modern frontend and backend technologies	
Apna College	June 2024
– Full Stack Web Development Course	

POSITION OF RESPONSIBILITY

Treasurer — Computer Engineering Society, DSMNRU Lucknow	Jul 2023 – Jan2026
– Led a team of developers to design and deploy a full-stack web application with user roles and video streaming.	
– Designed and developed the official CES website, ensuring a seamless and responsive user experience.	
Campus Ambassador Intern	Oct–Nov 2024
– Represented and promoted tech initiatives at university level
